

Environmental Management Policy

At LDA, we are committed to protecting the environment and preventing pollution as part of our business strategy and social responsibility.

LDA's environmental management system thus becomes an essential element for compliance with legal requirements and the sustainability of business processes, generating and maintaining the trust of customers, suppliers, employees, shareholders, competent authorities and society in general, maintaining and strengthening the corporate image of the company, and ensuring compliance with its strategic objectives and continuous improvement of environmental performance.

The LDA Management is committed to leading and supporting the environmental management system, ensuring that it has the necessary resources for its implementation, maintenance and continuous improvement.

Our environmental policy is based on the following

PRINCIPLES:

Compliance: Comply with all legal, regulatory, sectoral and contractual obligations that affect environmental protection

Efficient use of resources:

- Optimize energy consumption in our facilities and processes
- Minimizing the generation of waste

Reduce the environmental impacts of our activities:

- Responsible waste management
- Prevention of pollution

Awareness and Training: Be aware of environmental risks, as well as knowing and applying the necessary practices to protect the environment

Continuous improvement: Improve the effectiveness and efficiency of implemented controls to adapt to changing requirements and environmental conditions

This policy will be reviewed periodically by the LDA Management.
