

# EVAC<sup>cloud</sup> Cloud

EN 54-16

AES67

Dante<sup>®</sup>

Platform for remote supervision and support of LDA NEO/NEO+ system

 **LDA**  
audioTech

# EVAC Cloud

The platform allows you to **supervise, configure and support** an LDA NEO or NEO+ public address and voice alarm system through a secure cloud-based protocol.

Industrial hardware  
server with Linux

LDA EVAC Cloud  
software

Subscription to  
cloud-based service

KEY  
POINTS

Each LDA EVAC Cloud device is covered  
by the LDA NEO+ EN 54-16 certificate.

# HARD WARE

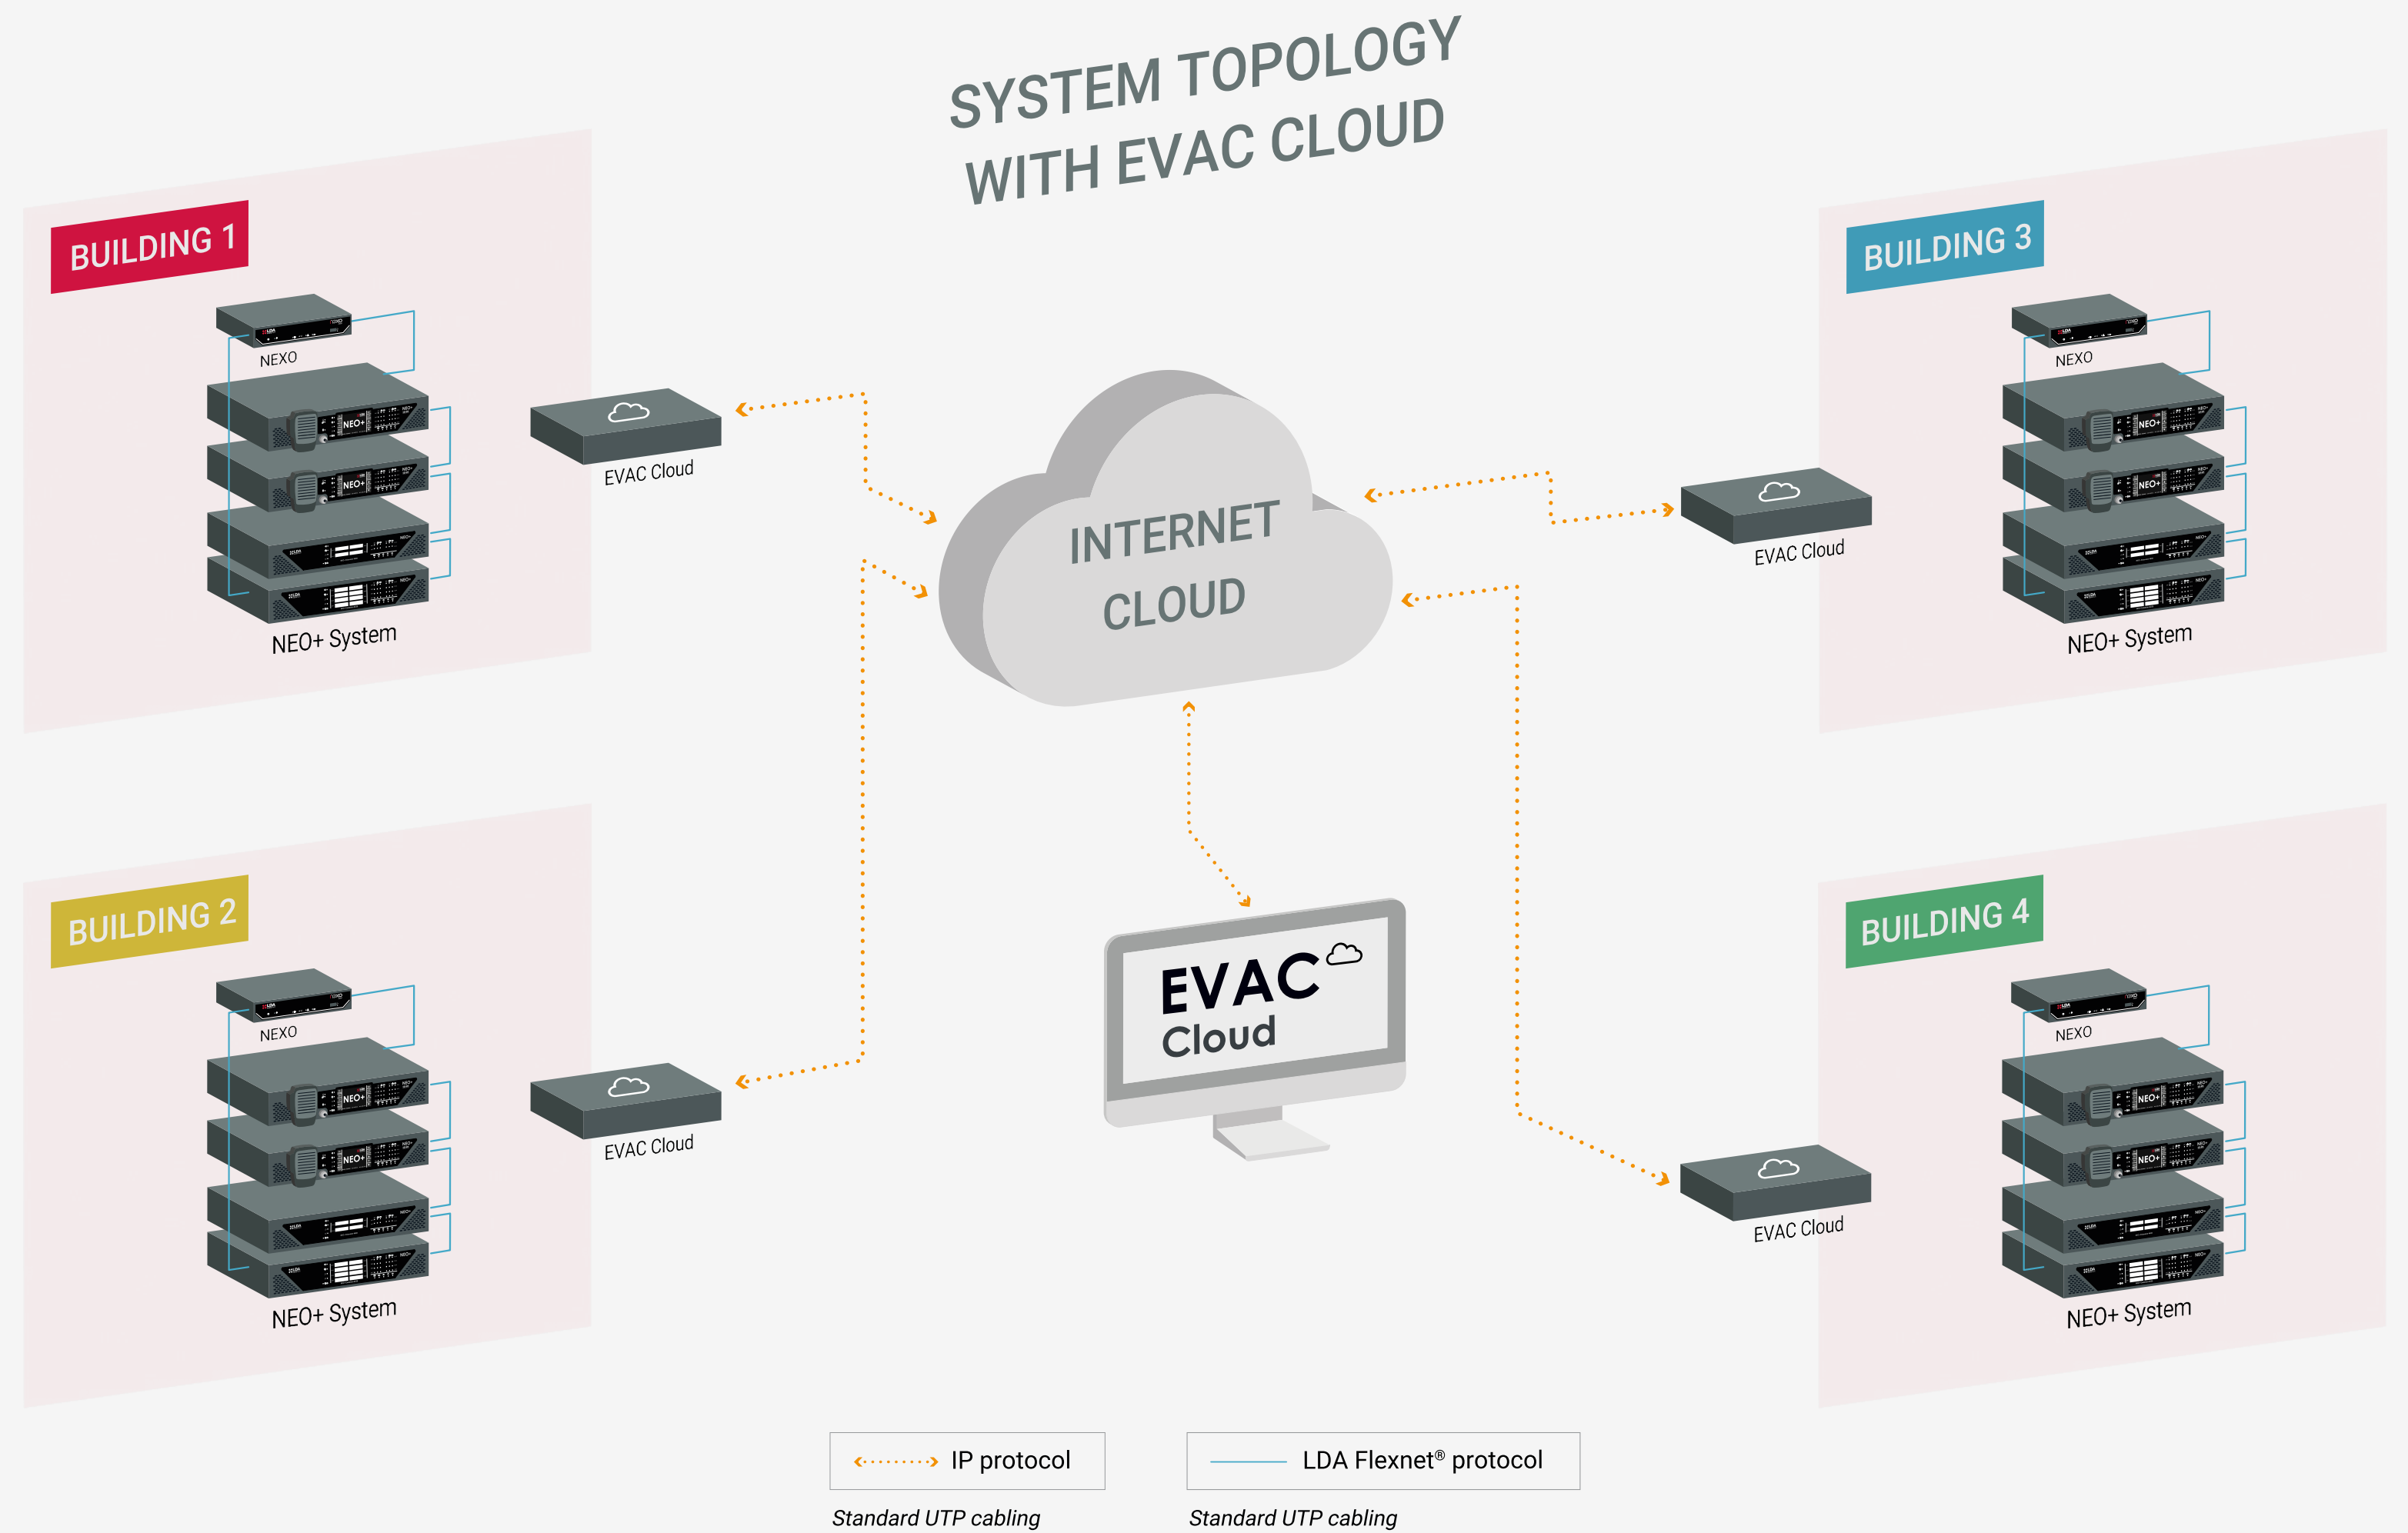

## Front View

## Rear View

# TOPOLOGY

# BENE FITTS

Immediate monitoring  
and reception  
of **alarms**

Integral system  
**supervision**

**Direct** access  
channel

Security layer  
according to the latest  
**cybersecurity** standards

Option for **remote**  
configuration for  
troubleshooting

Fire safety  
**EN 54** certificate

# SECURITY

## Strengths

- ✓ End-to-end security
- ✓ Authentication
- ✓ Data integrity
- ✓ Confidentiality
- ✓ Low latency
- ✓ Simplicity and efficiency

## International Standards

According to Euralarm/COESS Cybersecurity Framework:

European directives on industrial cybersecurity:  
Security for industrial automation and control systems

- IEC 62443-4-1:2018  
Part 4-1: Secure product development lifecycle requirements
- IEC 62443-4-2:2019  
Part 4-2: Technical security requirements for IACS components
