

NEXO-HUB

The NEXO Hub activation card allows converting a NEXO device into a permanent NEXO Hub for LDA NEO+ distributed multi-controller systems.

This card acts as a link proxy, separating the audio channels of the ACSINet Cluster from each of the ACSINet Domains.

Once activated, the card becomes the key that enables AES67 Processor of NEX, converting it in a NEXO Hub.

Features:

- NEXO Hub activation for LDA NEO+ distributed systems.
- Independence of audio channels in ACSINet Cluster.
- Creates a proxy link between ACSINet Domains.
- Enables continuous operation of NEXO as NEXO Hub once activated.
- Permanent solution after activation.

Technical specifications:

MODEL	NEXO-HUB
Reference	LDANEXOHUDS01
NEXO-HUB Hardware	uSD card
Package dimensions (W x H x D)	180 x 28 x 125 mm / 7.08" x 1.10" x 4.92"
Gross weight	0.1kg / 0.22lb
