INTRODUCTION

The **ONE-PTTS03** dynamic microphone extends the versatility of ONE500 V03 devices, adding **PA/VA** control in accordance with **EN54-16** certification.

Push To Talk microphone is directly connected to the main **ONE500**'s control board to its dedicated port.

ONE-PTTS03 is provided with a mounted magnet, you can attach this microphone to any metal surface and pick it up for a quick and easy call.

ONE-PTTS03 PA/VA microphone is only compatible with **ONE500 V03** devices.

DESCRIPTION

ONE500 V03 systems incorporate a high-quality PTT microphone preamplifier. This provides to the user the simplest installation method for the ONE-PTT function in **ONE500 V3** systems.

ONE-PTT preamp circuitry takes priority over other audio sources by pressing the PTT button.

CONFIGURATION

Before the ONE-PTT installation (see QUICK INSTALLATION GUIDE), user can define its usage case following the related title founded in the user manual.
